

UNICITY NEIGENE HYDRO RESTORATIVE EMULSION

People like soft things. We look for sheets with high thread counts, we buy cashmere sweaters and silk dresses. We touch these things and admire how nice they feel. But touch is even more important than what simply feels nice; it's how we communicate. Handshakes, hugs, high fives, and kisses all depend upon our sense of touch.

We can't all wear vicuna wool all the time, but it is possible to have touchable, soft skin. Neigene Hydro Restorative Emulsion helps care for

dry skin to leave it smooth and supple. This moisture-rich nourishing lotion provides essential hydration that lasts. Pure plant extracts work to cleanse the skin and protect it from environmental stresses. Hydro Restorative Emulsion gives you a luxurious feel you don't have to take off.

BENEFITS

Supports hydration and longevity for skin. *

Pure plant extracts work to promote radiance and rejuvenation in the skin.*

Beta glucan and dandelion help cleanse the skin and provide antioxidant support. *

SUGGESTED USE

Pump 1-2 times and gently smooth into the face.

Avoid contact with eyes.

AUDIENCE

Primary Target: People looking for a moisture-rich way to prepare skin for healthy aging.

Secondary Target: Individuals who want to promote softer, more radiant skin.
